

## **EXECUTIVE SUMMARY**

### **SOURCE DESCRIPTION:**

EnerSys operates a tube manufacturing facility in Richmond, Kentucky. The source submitted an application on June 04, 2004 to renew their Title V Permit (V-99-070). In addition, the source is also proposing to replace six (6) tube forming machines.

1. The source has accepted a facility-wide limit on annual VOC emission of no more than 225.0 tons to preclude the applicability of 401 KAR 51:017. The actual VOC emissions shall be calculated based on the 12-month rolling total.
2. The source has accepted a facility-wide limit on annual single HAP emissions of no more than 9.0 tons and combined HAPS of no more than 22.5 tons to preclude the applicability of 40 CFR 63 Subpart OOOO. The actual HAPs emissions shall be calculated based on the 12-month rolling total.

### **PUBLIC, AND U.S. EPA REVIEW:**

On December 16, 2004, the public notice on availability of the draft permit and supporting material for comments by persons affected by the plant was published in *Richmond Register* in Richmond, Kentucky. The public comment period expired 30 days from the date of publication. One comment was received from the source. For more detail, see attachment B for comment and Division's response.

U.S. EPA has 45 days to comment on this proposed permit. The company will be notified if any changes are made to the proposed permit based on the U. S. EPA comments. The permit is now being issued proposed.
